

THE GREENVILLE JOURNAL

"EXCELSIOR."

VOL. 84—Established 1832.

GREENVILLE, OHIO, THURSDAY, SEPTEMBER 9, 1915

No. 10.

Gettysburg.

After a jaunt over the country for three or more weeks through Texas and Mexico, and to the Panama exposition, and places lying between, L. B. Miller returned home last week somewhat rested from his usual routine of business, wearing a cheerful look of satisfaction on his face.

C. L. Dershem and wife went to Springfield last Tuesday to attend the M. E. conference held there during last week and over Sunday. The former filled the office of delegate to the lay conference in connection with the ministerial conference. The reports so far had of the work done is somewhat meager, but enough appears to indicate that a good many changes of pastorate were made. Lewis Erisman and wife and Frank Brown and wife were attendants there over Sunday.

R. A. Pickett and J. H. Warner of our city visited the State Fair one day last week and are pleased to say the exhibits were unusually large and good and the attendance was immense. It seems to be the ambition of the management to make every succeeding fair better and in this they succeeded admirably this year. The auto vehicle seemed to be largely in evidence and they were there by the thousands.

Glen Stoltz and wife of Pittsburgh, Pa., are here visiting his parents for a few days.

Some one remarked a few days ago that the camp meeting and reunion and the county fair were about all held and wondered what use the people would now have for their autos, when some suggested that they would still be useful to convey people to the shows, which seem to be coming about numerous. Of course, we will all want to go, and that vehicle will be very useful to convey us hither.

Our schools begin next Monday, when the pupils will have to gather their books, charts, and pencils and get themselves ready for a winter's campaign in storing their minds with useful knowledge and fitting themselves for usefulness in the world. It should be remembered they can make their lives sublime if they will, and departing leave behind a character worthy respect and imitation by their fellows.

After a spell of good weather an all day downpour of rain visited us yesterday and people were generally housed at home.

The remains of Jeremiah Miller's wife of New Harrison were committed to the silent tomb at Zion cemetery, funeral services conducted by Elder J. H. Christian.

C. L. Dershem and wife returned home this evening from Springfield well pleased with their attendance at the M. E. conference.

A sad accident occurred to the little daughter of Daniel Stover, a couple of miles north from here. It seems the driver left her on the vehicle while he went a few

steps away on a business matter, and while gone the horse started to trot off. The little girl had hold of the lines but she had not strength enough to stop the animal and becoming alarmed jumped for safety and broke the bone of one of her limbs. No harm otherwise.

Mrs. Sarah Rohr continues without improvement for the better.

Sept. 6.

XOB

A Wonderful Antiseptic.

Germ and infection aggravate ailments and retard healing. Stop that infection at once. Kill the germs and get rid of the poisons. For this purpose a single application of Sloan's Liniment not only kills the pain but destroys the germs. This neutralizes infection and gives nature assistance by overcoming congestion and gives a chance for the free and normal flow of the blood. Sloan's Liniment is an emergency doctor and should be kept constantly on hand. 25c., 50c. The \$1.00 size contains six times as much as the 25c. —Adv

Elements Needed to Keep Well.

Says the eminent physician, Dr. Charles D. Percival: "It is important all should learn the elements needed in our daily foods to build up the body. Make the diet as varied as possible. Avoid a sameness. Do not mix too many things together at one meal. Bear in mind the body demands a certain quantity of the following things: "First—Fats, which can be found in nuts, butter, olive oil, cream and certain cereals such as oatmeal. Fats sustain the nervous system and maintain heat.

"Second—Protein, which is found in nuts, macaroni, brown bread, whole wheat bread, eggs, oatmeal, cheese, lentils, beans and peas. Protein forms flesh, builds muscle and produces strength. "Third—Phosphates, which are found in most all vegetables and in the husk of the wheat, which is included in all the breads mentioned (not in white flour), bananas, cheese, apples and many of the fruits. Phosphates build the bone, feed the brain and nerves and purify the system.

"Fourth—Sugar, which is obtained by masticating starches, but most easily and best obtained in fresh fruits and pure honey. Sugar supplies heat and energy.

"Fifth—Water, which is necessary to purify the body and to supply the fluid for the excretions which are necessary to keep the system in a state of even health."

Frank S. Kiser to Jane Lickel, a small tract in Ansonia, \$2500.

George Coleman to Abraham Buckmaster, lot 1836 in Greenville, \$1.

H. H. Minnich to Russell House, part outlet 5 in Greenville, \$1300.

The Next Best Thing to the Pine Forests for Colds Is—

Dr. Bell's Pine-Tar-Honey which goes to the very root of cold troubles. It clears the throat and gives relief from that clogged and stuffed feeling. The pines have ever been the friend of man in driving away colds. Moreover, the pine-honey qualities are peculiarly effective in fighting children's colds. Remember that a cold broken at the start greatly removes the possibility of complications. 25c. —Adv

Palestine.

Warren Ware, a much respected citizen living northwest of Palestine, was found dead in his tobacco field last Friday. Apoplexy is said to have been the cause. Funeral services were conducted by Rev. C. W. Heoffer of Richmond, Ind., at Fairview Sunday afternoon. Burial was made at Greenville.

A show company entertained the people at the K. of P. hall last week. Miss Margaret Stahr received the prize—a handsome bracelet watch.

The annual reunion of the Wilcox family was held at the fair grounds last Saturday.

Mrs. Snyder of Mercer county is visiting relatives in this vicinity at this writing.

U. Z. Reigle and daughter Jennie called at T. J. Wilson's last Friday.

The Palestine school will open on next Monday, September 13.

Orville Baker was one of the lucky corn contest boys selected to go to the Ohio State Fair. He reports a very interesting trip.

Sept. 6. FROM PALESTINE.

Every Home Needs a Faithful Cough and Cold Remedy.

When seasons change and colds appear—when you first detect a cold after sitting next to one who has sneezed, then it is that a tried and tested remedy should be faithfully used. "I never wrote a testimonial before, but, I know positively that for myself and family, Dr. King's New Discovery is the best cough remedy we ever used and we have tried them all." 50c and \$1.00. —Adv

The Hardness of Water.

Here is a fact which is probably novel to the average man who has not spent much of his life thinking about motor speed boats. This is what we may call the hardness of the water when a boat is running at speed. Water at fifty miles an hour is not the limpid liquid we are accustomed to bathe in. If you put your arm overboard from a hydro-plane running at fifty miles an hour and strike a wave crest the probability is that you will break your arm or wrist, because at that speed the water has not time to give, not time even to change shape, and striking it is like striking so much metal.

In the great hydraulic mining nozzles, where a stream of water under enormous head is used to wash down hillsides, a swordsmen, in attempting to cut into one of those streams, will shatter the sword without being able to penetrate the water. The stream is like a bar of iron. The fact that water at relative speed is so hard—or that its inertia is so great, to be a little more accurate—is the reason why a skipping stone travels over the surface, and is the reason why a hydro-plane boat slides over the surface instead of plowing its way through.—American Magazine.

Substitute for Glass.

The glass used as windows in automobile bodies, particularly in the sedan and limousine types, has been a source of danger, due to the splintering in accidents, and manufacturers have long sought an efficient substitute. Celluloid and mica, while used to a large extent in touring car tops, have not been entirely satisfactory. A new material called celon is now being made by one of the large manufacturers of explosives. It is said to be practically unbreakable. Sheets of it can be bent backward and forward many times without breaking, and blocks of it can be subjected to heavy blows without fracture. It can be produced in any desired thickness up to half an inch and in plates of large size. A sheet of celon may be ignited by an open flame, but the burning portion will melt and a few drops fall to the ground. It will not continue to burn. It can be fastened down by nailing, or, in case of the thin sheets, by sewing, or it can be glued. It can be put to any of the uses of celluloid, as in toilet articles, switchboards, etc. It can be cut and trimmed with an ordinary knife, warmed in hot water and molded to any desired shape. No figures regarding its cost of production, which will determine its usefulness, are available.—Scientific American.

Chronic and Obscure Diseases.

If you are suffering from some obscure chronic disease, from which you have been unable to get relief, it is not to your advantage to consult a skillful specialist? Dr. Kutchin's system of treatment differs from many others. He only employs pure herbal remedies, and proceeds on principles which have been thoroughly tested in the great Hospitals of Europe and America. Many diseases are benefited by his methods. In chronic and obscure diseases he has achieved his most remarkable triumphs.

There are many cases in this county that were given up to die, who have been saved by his skill.

Why not go and see him and be examined?

Dr. Kutchin's next visit to Greenville, will be on Thursday, Sept. 16, at the Hotel James. —Adv

Common Complaint.

Patient—Doctor, have you ever treated a patient for loss of memory? The Doctor—Oh, yes; I employ a bill collector quite often.—Chicago News.

His Private Opinion.

Spiffin and Miffin were friends. They were strolling along one sunny Sunday afternoon in the rear of their respective wives when Spiffin, who was always something of a worrier, broke the contented silence.

"Look here, old man," said he, "I know you say the most awfully nice things about me to my face, and I've no reason to believe you do anything else behind my back. But it backs a chap up to be criticised by his friends every now and then, you know."

"You want me to criticize you?" asked Miffin, mildly smiling the clear and frosty air.

"I do," answered Spiffin, throwing out his chest and striking it impressively. "It would do me all the good in the world."

Miffin looked sideways at his friend and then burst out:

"Look here, Spiffin, you're six feet two; I'm five feet four. You can't seriously mean you want my private opinion of you. It can't be done, old chap; can't be done."—Answers.

FORCE OF BIG WAVES.

Fearful Power That Is Exerted by an Angry Sea.

The average inland American who has never seen the ocean has no real idea of the force of its waves. He reads about the storm, of boats being carried away and bulwarks stove, but he does not realize the steam hammer blows that may be struck by mere water.

A recent storm on the British coast received the official designation of a storm of "extreme force." A picture taken in Hastings harbor shows the concussion with which the waves struck the sea wall, sending the spray apparently higher than the buildings along the street. Blocks of concrete and iron railing were torn from the new parade extension at Caroline place and tossed back into the roadway as if they had been bits of plank. Timber work that had withstood the stress of years was torn apart and carried away. Basements were flooded along all the seaward face of the town.

Such a storm when it sweeps over a ship will sometimes carry away almost everything on deck. Deck houses are often smashed, and the lifeboats are often stove in and ruined.

Various attempts have been made to devise motors to develop power from the force of the waves. The amount of energy wasted through their lack of success is beyond estimate. If the power of the sea could be used it would drive the machinery of an unlimited number of plants.—Exchange.

None Safe.

"You admit, then," inquired the magistrate severely, "that you stole the pig?"

"I suppose I must," said the prisoner.

"Very well," returned the magistrate, with decision. "There has been a lot of pig stealing going on around here lately, and I am going to make an example of you or none of us will be safe."—Tit-Bits

If You Own Cows

It will not only be interesting but it will be profitable for you to read that little national dairy magazine, Kimball's Dairy Farmer. It is published semi-monthly at Waterloo, Iowa, the hub of the great dairy region of the central west. It is ably edited, well printed on good book paper and handsomely illustrated by actual photographs taken exclusively for it. Its purpose is educational and to the man who would make his cows yield larger profits, this little magazine is indispensable. Regardless of how many other papers the farmer may take, this one is worth many times its price to him. The subscription price is only 50 cents a year, and the paper will positively be discontinued at expiration. Send for sample copy.

Kimball's Dairy Farmer

Waterloo, Iowa.

To Our Farmer Readers

We can highly recommend this handsome dairy magazine to our farmer friends. Every man who owns cows will find it worth many dollars to him. Here is our offer to farmers: Kimball's Dairy Farmer 1 year.....\$1.50 Greenville Journal 1 year.....\$1.00

Regular price of both.....\$2.50 For a limited time we will send both one year to our farmer friends for only \$1.25.

Journal, Greenville, O.
